was offered assistance to stand or sit up. Client was laying face down in a shelter hallway as staff asked if there was anything that they could do. Limit setting was provided as the client was attempted to be reasoned with as it was explained that he was impeding a walk way. EMT's were dispatched and the client was taken to the hospital for further treatment and observation.

This session the therapeutic focus was on emotional support.

Assessment:

Joshua was physically inactive and anergic today, barely moving. His body language and posture suggested that depression was present. Client presented as confused. Client was unresponsive to instructions. Client spoke in repetitive fragments. Client's words were mumbled and incoherent. Client spoke in low volume. Client could not stand. Client's insight and his judgment appear to be poor. Client was casually dressed.

Plan: Continue to accommodate client to the best of shelter abilities and continue to prompt client to continue participating in programming plans now being implemented by shelter staff.
